

LEGISLATIVE BILL 186

Approved by the Governor February 21, 1995

Introduced by Fisher, 35; Robinson, 16

AN ACT relating to the Nebraska Rules of the Road; to amend section 60-6,294, Reissue Revised Statutes of Nebraska; to change provisions relating to dummy axles; and to repeal the original section.

Be it enacted by the people of the State of Nebraska,

Section 1. Section 60-6,294, Reissue Revised Statutes of Nebraska, is amended to read:

60-6,294. (1) Every vehicle, whether operated singly or in a combination of vehicles, and every combination of vehicles shall comply with subsections (2) and (3) of this section except as provided in section 60-6,297. The limitations imposed by this section shall be supplemental to all other provisions imposing limitations upon the size and weight of vehicles.

(2) No wheel of a vehicle or trailer equipped with pneumatic or solid rubber tires shall carry a gross load in excess of ten thousand pounds on any highway nor shall any axle carry a gross load in excess of twenty thousand pounds on any highway. An axle load shall be defined as the total load transmitted to the highway by all wheels the centers of which may be included between two parallel transverse vertical planes forty inches apart extending across the full width of the vehicle.

(3) No group of two or more consecutive axles shall carry a load in pounds in excess of the value given in the following table corresponding to the distance in feet between the extreme axles of the group, measured longitudinally to the nearest foot, except that the maximum load carried on any group of two or more axles shall not exceed eighty thousand pounds on the National System of Interstate and Defense Highways unless the Director-State Engineer pursuant to section 60-6,295 authorizes a greater weight.

60		85,500	90,000	95,000

(4) The distance between axles shall be measured to the nearest foot. When a fraction is exactly one-half foot, the next larger whole number shall be used, except that:

(a) Any group of three axles shall be restricted to a maximum load of thirty-four thousand pounds unless the distance between the extremes of the first and third axles is at least ninety-six inches in fact; and

(b) The maximum gross load on any group of two axles, the distance between the extremes of which is more than eight feet but less than eight feet six inches, shall be thirty-eight thousand pounds.

(5) The limitations of subsections (2) through (4) of this section shall apply as stated to all main, rural, and intercity highways but shall not be construed as inhibiting heavier axle loads in metropolitan areas, except on the National System of Interstate and Defense Highways, if such loads are not prohibited by city ordinance.

(6) The weight limitations of wheel and axle loads as defined in subsections (2) through (4) of this section shall be restricted to the extent deemed necessary by the Department of Roads for a reasonable period when road subgrades or pavements are weak or are materially weakened by climatic conditions.

(7) Two consecutive sets of tandem axles may carry a gross load of thirty-four thousand pounds each when the overall distance between the first and last axles of such consecutive sets of tandem axles is thirty-six, thirty-seven, or thirty-eight feet except as provided in section 60-6,297. Such vehicles shall be subject to section 60-6,301.

(8) If any truck crosses a bridge with a total gross load in excess of the posted capacity of such bridge and as a result of such crossing any damage results to the bridge, the owner of such truck shall be responsible for all of such damage.

(9) Vehicles equipped with a greater number of axles than provided in the tables in subsection (3) of this section shall be legal if they do not exceed the maximum load upon any wheel or axle, the maximum load upon any group of two or more consecutive axles, and the total gross weight, or any of such weights as provided in subsections (2) and (3) of this section.

(10) Subsections (1) through (9) of this section shall not apply to a vehicle which has been issued a permit pursuant to section 60-6,299 or to a rubber-tired crane with a fixed load when the requirements of subdivision (2)(j) of section 60-6,288 are met.

(11) Any two consecutive axles the centers of which are more than forty inches and not more than ninety-six inches apart, measured to the nearest inch between any two adjacent axles in the series, shall be defined as tandem axles, and the gross weight transmitted to the road surface through such series shall not exceed thirty-four thousand pounds. No axle of the series shall exceed the maximum weight permitted under this section for a single axle.

(12) Dummy axles shall be disregarded in determining the lawful weight of a vehicle or vehicle combination for operation on the highway.

Dummy axle shall mean an axle attached to a vehicle or vehicle combination in a manner so that it does not articulate or substantially equalize the load and does not carry at least the lesser of eight thousand pounds or eight percent of the gross weight of the vehicle or vehicle combination.

Sec. 2. Original section 60-6,294, Reissue Revised Statutes of Nebraska, is repealed.
